Final Business Rules for Calculating the 2018 ESSA School Index Scores

This document details the business rules used to calculate ESSA School Index Scores. The business rules reflect the details that support the ESSA School Index as described in the Arkansas plan for the Every Student Succeeds Act.

Contents

Overview

The ESSA School Index score is the sum of weighted indicator scores. The ESSA School Index consists of the following indicators.

- Weighted Achievement (scores range from 0 to 125. Includes English/Language Arts (ELA) and math).
- School Value-Added Growth (Content Growth plus English Learner (EL) Growth. (Scores range from 60 to 110 points. In some cases when the proportion of ELs is at a high level and the ELs growth score is at a high level the School Value-Added Growth score may reach 110 points.)
    - Content Growth (ELA and math growth scores combined for each student— scores range from 60 to 100 points.)
    - EL Value-Added Growth: EL progress to English Language Proficiency (ELP) at a weight that is proportional to number of ELs. (Scores range from 0 to 135 due to higher variability of EL Value-Added Scores among schools.)
- Adjusted Cohort Graduation Rate
    - Four-year Adjusted Cohort Graduation Rate (rates range from 0 to 100)
    - Five-year Adjusted Cohort Graduation Rate (rates range from 0 to 100)
- School Quality and Student Success (up to 100 points)
    - Student Engagement (Risk level due to Chronic Absence)
    - Science Achievement
    - Science Growth in Achievement
    - Reading at Grade Level
    - ACT Composite Score
    - ACT Readiness Benchmark Scores
    - Final High School GPA
    - Community Service Learning Credits Earned
    - On-time Credits Earned
    - Computer Science Credits Earned
    - Advanced Placement/International Baccalaureate/Concurrent Credit Course Credits Earned (Including Arkansas Career Education (ACE) Concurrent Credit Courses)

Each school is assigned to a grade span based on the grades the school serves (grade range of school). Grade span categories for each grade range are indicated below. The grade spans are determined in a logical manner based on the grade levels assessed on the statewide assessments. If a school grade range includes the majority of tested grades within a span, then the school is assigned to the grade span with other schools whose majority of grades are within the same grade span for comparability purposes. When a school configuration has an equal number of assessed grades for two grade spans, then the school is included in the higher grade span for comparability purposes. This is important given the weights of weighted achievement and growth in the ESSA School Index and the different components of the School Quality and Student Success indicator as described in the business rules that follow this overview.

Schools with special situations due to grade configurations are addressed at the end of the document. This includes feeder schools (no tested grades) and schools in the high school range that do not have a graduation rate.

Grade Span	Grade Ranges
PK-5	P - P P - K P - 1 P - 2 P - 3 P - 4 P - 5 P - 6 K - K K - 1 K - 2 K - 3 K - 4 K - 5 K - 6 1 - 2 1 - 3 1 - 4 1 - 5 1 - 6 2 - 3 2 - 4 2 - 5 2 - 6 3 - 3 3 - 5 3 - 6 4 - 5 4 - 6 5 - 5
Grades 6-8	P - 8 K - 8 4 - 7 4 - 8 5 - 6 5 - 7 5 - 8 6 - 6 6 - 7 6 - 8 7 - 8 7 - 9 8 - 8
Gr. 9 - 12	8 - 9 9 - 9 K - 12 5 - 12 6 - 12 7 - 12 8 - 12 9 - 12 10 - 12 11 - 12

Arkansas stakeholders included the required indicators in the customized ESSA School Index and identified weights to each indicator to determine the contribution of each indicator to the total ESSA School Index score for each school.

Arkansas' ESSA School Index weights are detailed below.

Component	Weight of Indicator within Index Grades K – 5 & 6 - 8	Component	Weight of Indicator within Index High Schools
Weighted Achievement Indicator	35%	Weighted Achievement and Academic Growth	70% total with Weighted Achievement accounting for half (35%) and School Growth Score accounting for half (35%)
Growth Indicator Academic Growth English Language Progress	50%		
Progress to English Language Proficiency	Weight of indicator in School Value-Added Growth Score is proportionate to number of English Learners	Progress to English Language Proficiency	Weight of indicator in School Value-Added Growth Score is proportionate to number of English Learners
Graduation Rate Indicator 4-Year Adjusted Cohort Rate 5-Year Adjusted Cohort Rate	NA		15% total 4-Yr = 10% 5-Yr = 5%
School Quality and Student Success Indicator	15%		15%

Business Rules by Indicator and Components of Indicators

The following tables provide the detailed business rules for each indicator. Some indicators have multiple components and these components are detailed within the description of the indicator.

For the purpose of clarifying the term full academic year, as used for these business rules, the Arkansas Department of Education uses the definition: Students who are continuously enrolled in a particular school on or before October 1 through the date of the accountability pull for the regular or alternate assessment are considered full academic year students (not highly mobile). Specific dates used for 2017-2018:

> October 1, 2017 – April 6, 2018 for ACT Aspire
>
> October 1, 2017 – March 15, 2018 for APA Science
>
> October 1, 2017 – March 16, 2018 for MSAA

The Community Eligibility Provision (CEP) is a non-pricing meal service option for schools and school districts in low-income areas. CEP allows the nation's highest poverty schools and districts to serve breakfast and lunch at no cost to all enrolled students. A school utilizing CEP will have 100 percent of students classified as economically disadvantaged for academic accountability calculations. For more information on CEP, please see ADE Commissioner's Memo http://adecm.arkansas.gov/ViewApprovedMemo.aspx?Id=3598 .

Participation—Percent Tested	
Description of Component or Indicator	To calculate percent tested, all students are included: full-academic year and highly mobile students. Percent Tested is included in the ESSA School Index calculation to the extent that if schools do not test 95% of students or 95% of a subgroup of students, the denominators for achievement calculations are adjusted to 95% of students expected to test at the school or in the subgroup as per ESEA Section 1111 (c)(4)(E)(ii).

Participation data	- Student enrollment, identification, and demographic information must be entered accurately into eSchool by 4 pm the day before the designated download date for participation data. - The date for the participation download is determined by ADE Office of Student Assessment and the Public School Accountability division.
	  a. For 2018, the student enrollment data used to determine schools' students who are expected to test will be downloaded from TRIAND on May 7, 2018.
	    i. Schools would need to have any necessary updates to student enrollment in eSchool by May 4, 2018 in order for the updates to be in the participation data pull.
	  b. Student enrollment data for students expected to take the Arkansas Alternate Portfolio Assessment for Science will be downloaded on March 15, 2018.
	  c. Student enrollment data for students expected to take the MSAA on April 30, 2018.
	    i. Schools would need to have any necessary updates to student enrollment in eSchool by April 27, 2018 in order for the updates to be in the participation data pull. - Full academic year and highly mobile students enrolled in a school at the time of testing are expected to take the state achievement test.

Participation—Percent Tested	
	• The participation enrollment file will be compared to the files pulled for accountability/performance enrollment (APA Science March 15, 2018; MSAA March 16, 2018; ACT Aspire April 6, 2018). Students in the accountability/performance file who are not in the participation enrollment file will be expected to have a Reason Not Tested in ACT Aspire, APA Science, or MSAA, or will need a Reason Not Tested added through the Assessment Correction Engine to evaluate whether the student was expected to test or can be removed from the denominator for expected to test. Please see Appendix C for more information.
Included Subgroups	1. All Students – All students in the school. 2. White – Student identified race is White and no other race or ethnicity is indicated. 3. African American – Student's race is identified as African American and no other race or ethnicity is indicated. 4. Hispanic/Latino(a) – Student's ethnicity is identified as Hispanic/Latino(a). A student is designated as Hispanic/Latino(a) regardless of whether any other races are identified for the student. 5. Economically Disadvantaged – Student is indicated as participating in the Federal Free and Reduced Price Lunch Program. 6. English Learner – Student is indicated as an English Learner (EL) or student is indicated as a Former Monitored EL (for up to four years after exiting EL services). 7. Student with Disability(ies) – Student is indicated as receiving special education services.
Assessments & Grade Levels Included	1. ACT Aspire, Grades: 3 – 10 2. Multi-State Alternate Assessment (MSAA) for English Language Arts (ELA) and math, Grades: 3 – 8, 11 for students flagged for alternate ELA and math assessment 3. Arkansas Alternate Portfolio Assessment for Science (APA Science), Grades: 5, 7, 10, for students flagged for alternate science portfolio
Included Subjects	1. Math 2. ELA 3. Science

Students excluded from calculations	a. Students are removed from enrollment based on the following resident codes downloaded from TRIAND for the participation data:
	     a. Resident Code X (Residential Treatment)
	     b. Resident Codes 1, 2, and 4 (Home School codes)
	     c. Educational Placement Codes: Correctional Facility (CF), Private Residential (RI), Parent Placed (PP), Hospital/Homebound (HH)
	 b. Students automatically excluded from percent tested calculations are students with the following Reasons Not Tested:
	     a. ACT Aspire
	       (1) Incarcerated/ Juvenile Detention/ Deceased
	       (2) Homeschool student enrolled for classes or extracurricular
	       (3) Residential Treatment
	     b. MSAA
	       (1) Exempt
	       (2) Administration Irregularity
	     c. APA Science
	       (1) Moved to a different state/out of country
	       (2) Out-of-state transfer student enrolled after January 15, 2018
	       (3) Participated in an alternative program or setting (such as homebound, home school, residential treatment, juvenile detention, incarcerated, etc.)
	       (4) Participated in regular assessment (ACT Aspire)
	       (5) Health problems or pregnancy resulted in extended absence or death of student

Determining percent tested	Perform the following calculations for all students and each subgroup of students:

Participation—Percent Tested	
	1. Count the number of students who tested (tested flag = 1) and those who were expected to test but did not (tested flag = 0) by subject for each of the ESSA subgroups at each school. 2. Sum the two counts (tested flag = 1 and tested flag = 0) to produce the total number of students *expecting* to test at each school by subject for each of the ESSA subgroups. 3. Determine the percent tested for each subgroup as the number who *actually* tested divided by the number *expected* to test as in the formula below. $$Percent\ Tested = \left(\frac{\#\ students\ tested}{\#\ students\ expected\ to\ test}\right) \times 100$$ 4. Round percent tested calculation to two decimal places.
Adjustment for Testing Fewer than 95%	For any school that did not test at least 95% in ELA and/or math for any group (all students and/or any subgroup of students), an adjusted denominator will be calculated for use in the **Weighted Achievement Score.** The adjusted denominator for any group is the number that is equal to 95% of the number of students expected to test for that group/subject. The adjusted denominator will be truncated (rounded down) to the lowest whole number in the case where 95% results in a fraction of a student.
Variables in final Percent Tested Table	• District LEA • District Name • School LEA • School Name • Subgroup • Number of students tested in Math • Total number of students expected to test for Math • Percent of students tested in Math • Number of students that equal 95% of those expected to test in Math • Number of students tested in ELA • Total number of students expected to test for ELA • Percent of students tested in ELA • Number of students that equal 95% of those expected to test in ELA • Number of students tested in Science • Total number of students expected to test for Science • Percent of students tested in Science • Number of students that equal 95% of those expected to test in Science

Weighted Achievement (Math and ELA)	
Description of Component or Indicator	Arkansas will use a *non-compensatory Weighted Achievement calculation within the ESSA School Index to incorporate academic achievement into its annual meaningful differentiation of schools. Weighted Achievement refers to assigning point values to each of the four achievement levels on Arkansas's grade level assessments for math and English Language Arts (ELA), aggregating those points at the school level for all students and for each student group, and calculating the proportion of points earned by a school based on the number of full-academic year students tested at the school. *Models are said to be non-compensatory when good performance on one evaluative criterion does not offset or compensate for poor performance on another evaluative criterion. **Note:** The four achievement levels for ELA are not provided in the ACT Aspire vendor provided reports. Only a readiness determination is provided for ELA. The cut scores for the four achievement levels for ELA are provided in Appendix A.
Included Subgroups	1. All Students – All students in the school. 2. White – Student's race is identified as White and no other race or ethnicity is indicated. 3. African American – Student's race is identified as African American and no other race or ethnicity is indicated.

Weighted Achievement (Math and ELA)	
	4. Hispanic/Latino(a) – Student's ethnicity is identified as Hispanic/Latino(a). A student is designated as Hispanic/Latino(a) regardless of whether any other races are identified for the student.
	5. Economically Disadvantaged – Student is indicated as participating in the Federal Free and Reduced Price Lunch Program.
	6. English Learner – Student is indicated as an English Learner (EL) or student is indicated as a Former Monitored EL (for up to four years after exiting EL services).
	7. Student with Disability(ies) – Student is indicated as receiving special education services.
	Data pulled from TRIAND: MSAA March 16, 2018 ACT Aspire –April 6, 2018
Assessments & Grade Levels Included	1. ACT Aspire, Grades: 3 – 10 2. Multi-State Alternate Assessment (MSAA) for English Language Arts (ELA) and math, Grades: 3 – 8, 11 for students flagged for alternate ELA and math assessment.
Included Subjects	1. Math 2. ELA
Students excluded from calculations	1. Exclude Foreign Exchange students from calculations. 2. Exclude home schooled students (Resident Code = 1, 2, 4) if student state ID and LEA are accurate for match to enrollment data downloaded from TRIAND. 3. Exclude students who are not full academic year (highly mobile students) from accountability calculations, respectively. 4. Students who do not have a test score are excluded from Achievement calculations.
Determining Weighted Achievement	Perform the following calculations for the All Students group and each subgroup of students: 1. Sum the number of full academic year students at each achievement level (Levels 1-4) in ELA and math to obtain the #L1 (math + ELA), #L2 (math + ELA), #L3 (math + ELA), #L4 (math + ELA). Include MSAA and ACT Aspire in the sum for each achievement level. 2. Compare the sum of math and ELA L1 students to the sum of math and ELA L4 students to determine number of L4 students multiplied by 1.00 and # of L4 students multiplied by 1.25.

Determining Weighted Achievement (continued):

    a. If #L1 students $\geq$ #L4 students then all L4 students multiplied by 1.00;

    b. If #L1 students < #L4 students then #L1 = #L4 students multiplied by 1.00 and #L4 students >#L1 students multiplied by 1.25.

    c. For all other achievement levels multiply # at each level by points for the level.

    d. Example 1:

	#L1 students	#L2 students	#L3 students	#L4 students
ELA	2	3	4	7
Math	7	4	3	2
SUM at each level	9	7	7	9*
Points at each level	9*0.00 =0.00	7*0.50 = 3.50	7*1.00= 7.00	9*1.00 = 9.00

*Sum at L1 = 9 = Sum at L4. Subtract #L1s from #L4s. 9 – 9 =0. Therefore, #L4 multiplied by 1.00 point. 9*1.00 = 9 points for L4.

    d. Example 2:

	#L1 students	#L2 students	#L3 students	#L4 students
ELA	3	2	4	2
Math	2	4	3	2
SUM at each level	5	6	7	4*

Weighted Achievement (Math and ELA)

		5*0.00 = 0.00	6*0.50 = 3.00	7*1.00 = 7.00	4*1.00 = 4.00
	Multiply # at each level to get Points at each level	5*0.00 = 0.00	6*0.50 = 3.00	7*1.00 = 7.00	4*1.00 = 4.00

*Sum at L1 = 5 > Sum at L4 = 4. Subtract #L1s from #L4s. 4-5 = -1. Therefore, #L4 multiplied by 1.00 point. 4*1.00 = 4.00 points for L4.

    e.   Example 3:

	#L1 students	#L2 students	#L3 students	#L4 students
ELA	2	3	4	7
Math	3	2	5	6
SUM at each Level	5	5	9	13*
Multiply # at each level to get Points at each level	5*0.00 = 0.00	5*0.50 = 2.50	9*1.00 = 9.00	(5*1.00) + (8*1.25) = (5 + 10) = 15

*Sum at L1 = 5 < Sum at L4 = 13. Subtract #L1 from #L4. The difference is multiplied by 1.25. Since there are 5 L1s then 5L4s must be multiplied by 1.00 and the remaining L4s are multiplied by 1.25.
(5L4s*1.00) + (8L4s*1.25) points = 15 points for L4.

3. Calculate the weighted achievement score. Divide the sum of the points for all achievement levels by the sum of the # of students at all achievement levels:

$$\text{weighted achievement score} = \left(\frac{\text{Points for L1} + \text{Points for L2} + \text{Points for L3} + \text{Points for L4}}{\#L1 + \#L2 + \#L3 + \#L4 + \text{Possible Adjustment}} \right) \times 100$$

$$\text{weighted Achievement score Example 1} = 100 * \left(\frac{0 + 3.5 + 7 + 9}{9 + 7 + 7 + 9} \right)$$

$$\text{weighted Achievement score Example 1} = 100 * \left(\frac{19.5}{32} \right)$$

$$\text{weighted Achievement score Example 1} = 100 * (0.609375)$$
weighted Achievement score Example 1 = 60.94 rounded to nearest hundredth.

Where the possible adjustment equals the number of students added to the denominator in the event that a school does not test at least 95% of all students or 95% of a subgroup of students in each subject (ELA and/or math). The denominators for achievement calculations are adjusted to 95% of students expected to test at the school or in the subgroup for that subject as per ESEA Section 1111 (c)(4)(E)(ii).

Content Growth Score

Description of Component or Indicator	Students' math and English Language Arts (ELA) value-added growth scores are averaged to obtain the content value-added growth score (Content VAS). The content VAS for a school indicates, on average, the extent to which students in the school grew in math and ELA achievement compared to how much we expected them to grow, accounting for how the students had achieved in prior years.
Included Subgroups	1. All Students – All students in the school. 2. White – Student's race is identified as White and no other race or ethnicity is indicated.

Content Growth Score	
	3. African American – Student's race is identified as African American and no other race or ethnicity is indicated.
	4. Hispanic/Latino(a) – Student's ethnicity is identified as Hispanic/Latino(a). A student is designated as Hispanic/Latino(a) regardless of whether any other races are identified for the student.
	5. Economically Disadvantaged – Student is indicated as participating in the Federal Free and Reduced Price Lunch Program.
	6. English Learner – Student is indicated as an English Learner (EL) or student is indicated as a Former Monitored EL (for up to four years after exiting EL services).
	7. Student with Disability(ies) – Student is indicated as receiving special education services.
	Data pulled from TRIAND:
	ACT Aspire –April 6, 2018
Assessments & Grade Levels Included	1. Past Tests Included if part of students' score histories: • ACT Aspire, Grades 3 - 10 • Arkansas Benchmark Exam, Grades: 3 - 8 • End Of Course (EOC) Algebra Exam, Grades 8 - 12 • EOC Geometry Exam, Grades 8 - 12 • PARCC Exam, Grades 3 - 10 • ITBS, Grades 1- 2 • Beginning in 2018, Grades 1 and 2 assessments from districts' selected vendors will be studied for use in student score histories for value-added growth calculations 2. Current Tests Included: • ACT Aspire, Grades 3 - 10 • ITBS, Grades 1 – 2 • Beginning in 2018, Grades 1 and 2 assessments from districts' selected vendors will be evaluated for use in student score histories for value-added growth calculations. These assessments are from NWEA, I-Station, and Renaissance.
Included Subjects	1. Math 2. ELA

Student Scores Included in Calculations.	1. Students in Grades 3 – 10 with current year scores on the ACT Aspire are included in calculations. Score histories are constructed for these students using their current year score and up to four prior years of assessment scores.
	2. Four prior years of assessment scores for students in Grades 3 – 10 include their prior scores from assessments in Grades 1-9 in ELA and in math which may include Algebra &/or Geometry End of Course Exams (EOCs).
	   a. Scores from students' assessments in Grades 1 and 2 are only used for Grade 3 students' score histories when available to enable growth calculations for Grade 3 students.
	   b. Algebra and Geometry scores from prior years of the Arkansas Benchmark Exam and/or PARCC Exam for students who were in Grades 8 - 10 at the time are included in students' score histories where applicable.
	3. Grades 3 – 10 science scores for 2016 and 2017 ACT Aspire were used for science growth. Science growth is available for Grades 4 – 10.

Students Excluded from Calculations	1. Exclude students with scores from the MSAA, ELA and math assessments and the APA Science assessments. 2. Exclude students who do not have a current year test score. 3. Beginning in 2018, exclude home schooled students (Resident Code = 1, 2, 4) if student state ID and LEA are accurate for match to enrollment data downloaded from TRIAND. 4. Exclude students who are highly mobile from aggregations. However, highly mobile students *are* included in calculations of individual student growth scores.

Content Growth Score	
Special Student Level Considerations	1. For students who were retained or repeated a course (Algebra and/or Geometry), their most recent score for the retained grade/course is used in their score history. 2. ELA scores for students in Grades 1 and 2 are the average of the ITBS Language and Reading Scale Scores.
Student Growth Score Calculations	1. Student score histories are compiled by subject and contain from two to five data points. 2. Scores are standardized by year, subject, grade and test group to support a growth model calculation across the different assessments. 3. Controlling for English language level: Students' English Language Proficiency (ELP) levels for the current year (ELPA21 Levels 1, 2 or 3) are included at the student level of the model to control for students' English Learning levels. If a student is not indicated as an EL student, the student is designated "English Only" thus the student was not expected to take the ELP assessment and therefore does not have an ELPA21 score. English Only students are assigned as English Proficient (ELPA21 Level 3). 4. For each subject, standardized scores of students with more than one year of data are put into a mixed model from which a predicted score and residual (difference between actual score and predicted score) are calculated conditioned on student's individual achievement score history and student's ELP. 5. Calculate a student content growth score by averaging the math and ELA growth scores for each student. If a student only tested in ELA or math, that subject score will be the student's content growth score.
Determining Mean School ELA and Math VAS	Perform the following calculations for math and ELA to determine the average school value-added content scores: 1. Count the total number of full academic year students tested for all students and for each subgroup. These totals will serve as the denominators for the mean school calculations. 2. Sum the student content growth scores of full academic year students for all students and each subgroup. 3. Determine the school level mean growth scores (Math (Math VAS) and ELA (ELA VAS)). The school level mean growth score for each subject can be calculated by summing the student growth scores for full academic year students and dividing by the total number of full academic year students with growth scores. For example, the math growth score for each school's all students group is calculated using the following formula: $$Math_{all} \ VAS = \left(\frac{\sum math \ growth \ scores \ of \ all \ students \ at \ the \ school}{Total \ number \ of \ students \ at \ the \ school \ with \ a \ math \ growth \ score} \right)$$ 4. School growth scores for all students and for each subgroup are transformed to a 100-point scale where a score of 80 represents that students, on average, are meeting expected growth in the school. For example, the math transformed score is calculated using the following formula: $$\begin{matrix} Math_{all} \ VAS \\ Transformed \end{matrix} = (35 \times Math_{all} \ VAS) + 80$$
Determining Mean School Combined	1. The school mean Content VAS score is calculated in a multi-step process. The first step is to determine a student-level content VAS for each full academic year student (those students not highly mobile).

Content Growth Score	

ELA/Math Content VAS	a. For students who have only one subject score, the content VAS = subject VAS.
	
	    i. If student has only a math VAS then the student's content VAS = math VAS.
	
	        1. **Example:** Student A has only a math VAS = 0.22. Therefore, content VAS for Student A = 0.22
	
	    ii. If student has only an ELA VAS then the student's content VAS = ELA VAS.
	
	        1. **Example:** Student B has only an ELA VAS = -1.27. Therefore, content VAS for Student B = -1.27.
	
	b. For students who have both subjects, the student's content VAS $= \frac{ELA\ VAS + Math\ VAS}{2}$
	
	    1. **Example:** Student C has a math VAS = 1.67 and an ELA VAS = 0.86. Therefore, content VAS for Student C $= \frac{1.67\ +\ 0.86}{2} = \frac{2.53}{2} = 1.265$
	
	2. The school mean Content VAS can be calculated by summing the content growth scores of the full academic year students and dividing the sum by the total number of full academic year students with combined growth scores. The school level mean Content VAS is calculated using the following formula:
	
	$$School\ Content\ VAS = \left(\frac{\sum content\ growth\ scores}{Total\ number\ of\ students\ with\ a\ content\ growth\ score}\right)$$
	
	Example:
	
	$$School\ Content\ VAS = \left(\frac{Content\ VAS\ student\ A + content\ VAS\ student\ B + content\ VAS\ student\ C}{3}\right)$$
	$$School\ Content\ VAS = \left(\frac{0.22+\ -1.27+1.265}{3}\right) = \left(\frac{0.215}{3}\right) = 0.0717$$
	
	3. To include school mean Content VAS in the ESSA School Index, the values must be transformed to a 100 point scale that will work within the total point scale for the rating system. A score of ~80 represents expected growth. Content VAS are transformed using the equation below.
	
	$$\begin{matrix}Content\ VAS \\ Transformed\end{matrix} = (35 \times Content\ VAS) + 80$$
	
	    Example:
	
	$$\begin{matrix}Content\ VAS \\ Transformed\end{matrix} = (35 \times 0.0717) + 80 = 2.5095 + 80 = 82.5095 = 82.51$$

Variables in Final Content Growth Table	• District LEA • District Name • School LEA • School Name • Subgroup • Test Group

Content Growth Score	
	• Math N
	• Math School VAS
	• ELA N
	• ELA School VAS
	• Combined Content Growth N (the number of students with math and/or ELA; a score-single count)
	• School Content VAS
	• School Content VAS Transformed
	• Content VAS Standard Error of the Mean Transformed
	• Content VAS Lower Confidence Limit Transformed
	• Content VAS Upper Confidence Limit Transformed
	• Math VAS Standard Error of the Mean
	• Math VAS Lower Confidence Limit
	• Math VAS Upper Confidence Limit
	• Math VAS Confidence Interval
	• ELA VAS Standard Error of the Mean
	• ELA VAS Lower Confidence Limit
	• ELA VAS Upper Confidence Limit
	• ELA VAS Confidence Interval

ELP Growth Score	
Description of Component or Indicator	A mean English Language Proficiency value-added growth score (ELP VAS) is obtained for each school that has one or more English learners. The ELP VAS indicates, on average, the extent to which students in the school grew in English Language Proficiency (ELP) compared to what was expected, accounting for how the student had been progressing in English language in prior years.
Included Subgroups	1. All Students – All students in the school. 2. White – Student's race is identified as White and no other race or ethnicity is indicated. 3. African American – Student's race is identified as African American and no other race or ethnicity is indicated. 4. Hispanic/Latino(a) – Student's ethnicity is identified as Hispanic/Latino(a). A student is designated as Hispanic/Latino(a) regardless of whether any other races are identified for the student. 5. Economically Disadvantaged – Student is indicated as participating in the Federal Free and Reduced Price Lunch Program. 6. English Learner – Student is indicated as an English Learner (EL) or student is indicated as a Former Monitored EL (for up to four years after exiting EL services). 7. Student with Disability(ies) – Student is indicated as receiving special education services. Data pulled from TRIAND: ELPA21 March 5, 2018

Assessments & Grade Levels Included	1. Past Test Included:
	    • ELDA, Grades K - 12
	2. Current Test Included:
	    • ELPA21, Grades: K - 12

Student Observations Included in Calculations	1. Student score histories contain from two to five data points: current year ELPA21 scores and up to four prior years of assessment scores. 2. Scores are standardized by year, grade, and test group to support a growth model calculation across the different assessments. 3. If a student has more than one ELP score for a given year, the observation with the highest score for that student will be retained. 4. Scores for students with current grade values of K-12 are included.

ELP Growth Score	
	5. Demographics of ELs who have assessments in math, ELA, and/or science will be assigned the demographics from the content test as those have gone through the corrections process. If no content test exists for the student, demographics from the ELP assessment will be used. 6. Highly mobile students are included in calculations of student growth scores, but excluded from aggregations of school level ELP VAS.
Scores for Students Excluded from Calculations	1. Exclude students who do not have a current year test score. 2. Beginning in 2018, exclude home schooled students (Resident Code = 1, 2, 4) if student state ID and LEA are accurate for match to enrollment data downloaded from TRIAND.
Student ELP Growth Score Calculations	1. Current students are matched with their prior years of ELP assessment scores to construct an ELP score history for the student. 2. Scores are standardized within grade level and test for each year. 3. Standardized scores of students with more than one year of data are put into a mixed model from which a predicted score and residual (difference between actual score and predicted score) are calculated from a student's individual ELP achievement score history. 4. Students' initial English language proficiency level (values of $1-5$ for ELDA and values of $1-3$ for ELPA21) are included in the model along with the year of their initial assessment to control for ELs entry language and test given their entry year.
Determining Mean School ELP VAS	Repeat the following steps for the all students group and all subgroups. 1. Count the total number of full academic year students with an ELP growth score tested at each level. This total will serve as the denominator for the mean ELP VAS calculation. 2. Sum ELP growth scores of full academic year students. 3. Determine the school mean ELP VAS by dividing the sum of the ELP growth for full academic year students by the total number of full academic year students with an ELP growth score. The ELP growth score is calculated using the following formula: $$ELP\ VAS = \left(\frac{\sum EL\ growth\ scores}{Total\ number\ students\ with\ EL\ growth\ Scores} \right)$$ 4. To include school mean ELP VAS in the ESSA School Index, the values must be transformed to a 100 point scale that will work within the total point scale for the rating system. A score of ~80 represents expected growth. ELP VAS are transformed using the equation below. $$\underset{Transformed}{ELP\ VAS} = (35 \times ELP\ VAS) + 80$$
Variables in Final ELP Growth Table	• District LEA • District Name • School LEA • School Name • Subgroup • ELP N • School ELP VAS • ELP VAS Standard Error of the Mean • Lower ELP VAS Confidence Limit • Upper ELP VAS Confidence Limit • ELP VAS Confidence Interval

School Value Added Growth Score	
Description of Component or Indicator	School value-added growth scores (VAS) include student growth in the content areas of math and English Language Arts (ELA) as well as student growth in English Language Proficiency (ELP). A weighted sum of the Content VAS and ELP VAS is divided by the total number of students contributing to the overall School Value Added Growth Score in which each full academic year English Only student counts only once in the content growth component and each full academic year English Learner (EL) student can count once for content (assuming there is a content score) and once for ELP Growth.
Groups Calculated	1. All Students – All students in the school. 2. White – Student's race is identified as White and no other race or ethnicity is indicated. 3. African American – Student's race is identified as African American and no other race or ethnicity is indicated. 4. Hispanic/Latino(a) – Student's ethnicity is identified as Hispanic/Latino(a). A student is designated as Hispanic/Latino(a) regardless of whether any other races are identified for the student. 5. Economically Disadvantaged – Student is indicated as participating in the Federal Free and Reduced Price Lunch Program. 6. English Learner – Student is indicated as an English Learner (EL) or student is indicated as a Former Monitored EL (for up to four years after exiting EL services). 7. Student with Disability(ies) – Student is indicated as receiving special education services.
Calculation	1. Determine the total number of full academic year students to be counted in Growth. A student will count only once for their content growth score. If a student has a content growth score and an ELP growth score, the student will count twice in the overall school value-added growth calculation. $$\begin{array}{l}\text{Number of Students} \\ \text{in Growth Calculation}\end{array} = \begin{array}{l}\#of\ students\ with\ a\ combined \\ content\ growth\ score\end{array} + \begin{array}{l}\#of\ students\ with \\ an\ ELP\ Growth\ Score\end{array}$$ 2. Calculate the School Value-added Growth Score with a weighted average of combined content growth and ELP growth. $$\begin{array}{l}\text{School Value} \\ \text{Added Growth}\end{array} = \frac{\begin{array}{l}\#in\ Combined \\ Content\ Growth\end{array} * \left(\begin{array}{l}Transformed\ School \\ Content\ Growth\ Score\end{array}\right) + \begin{array}{l}\#in\ ELP \\ Growth\end{array} * \left(\begin{array}{l}Transformed\ School \\ ELP\ Growth\ Score\end{array}\right)}{\#\ in\ Combined\ Conent\ Growth + \#\ in\ ELP\ Growth}$$ 3. Calculate a two-year* weighted average of the School Valued-added Growth Score to be used for schools who have less than 15 students in the Growth Calculation. $$\begin{array}{l}\text{Number of Students} \\ \text{in 2yr Growth Calculation}\end{array} = \begin{array}{l}Number\ of\ Students \\ in\ 2016\ Growth\ Calculation\end{array} + \begin{array}{l}Number\ of\ Students \\ in\ 2017\ Growth\ Calculation\end{array}$$ $$\begin{array}{l}\text{School 2 yr Value} \\ \text{Added Growth}\end{array} =$$ $$\frac{\begin{array}{l}Number\ of\ Students\ in \\ 2016\ Growth\ Calculation\end{array} * \left(\begin{array}{l}2016\ School\ Value \\ Added\ Growth\end{array}\right) + \begin{array}{l}Number\ of\ Students\ in \\ 2017\ Growth\ Calculation\end{array} * \left(\begin{array}{l}2017\ School\ Value \\ Added\ Growth\end{array}\right)}{Number\ of\ Students\ in\ 2yr\ Growth\ Calculation}$$ *Starting with the 2017-2018 school year, when the All Students group has fewer than 15 students, a three-year weighted average will be used for the School Value-added Growth Score.

Graduation - 4 year Adjusted Cohort	
Description of Component or Indicator	Students are expected to graduate within four years. A student will be identified for an adjusted cohort group by the year the student is first enrolled as a ninth grade student. Early graduates will be

Graduation - 4 year Adjusted Cohort	
	credited to the four-year adjusted cohort group created in which the student enrolled as a ninth grade student.
Included Subgroups	1. All Students – All students in the school. 2. White – Student's race is identified as White and no other race or ethnicity is indicated. 3. African American – Student's race is identified as African American and no other race or ethnicity is indicated. 4. Hispanic/Latino(a) – Student's ethnicity is identified as Hispanic/Latino(a). A student is designated as Hispanic/Latino(a) regardless of whether any other races are identified for the student. 5. Economically Disadvantaged – Student is indicated as participating in the Federal Free and Reduced Price Lunch Program. 6. English Learner – Student is indicated as an English Learner (EL) or student is indicated as a Former Monitored EL (for up to four years after exiting EL services). 7. Student with Disability(ies) – Student is indicated as receiving special education services.

Excluded Students	Students are removed from a school's cohort if the student meets the definition of a transfer as per USDE Guidance Question B-3 on page 16.
	 https://www2.ed.gov/policy/elsec/leg/essa/essagradrateguidance.pdf
	 A transfer out of a cohort occurs when a student leaves a high school and enrolls in another high school or in an educational program from which the student is expected to receive a regular high school diploma or State-defined alternate diploma that meets the requirements described in question A16.
	 A State may not count as a transfer a student who is retained in grade, enrolls in a general equivalency diploma program, is transferred to a prison or juvenile facility that does not provide (or from which the student is not expected to receive) a regular high school diploma or a State defined alternate diploma that meets the requirements described in question A-16, or leaves high school for any other reason in the four-year or extended-year graduation rate; such students must remain in the adjusted cohort (i.e., must be included in the denominator of the graduation rate for that cohort). (ESEA section 8101(23)(C) and (25)(C); 34 C.F.R. § 200.34(b)(2)-(3)).
	 • Transfers out;
	      a. An on-time student enrolled in another school in Arkansas (SIS withdrawal code = 1 and student enrolls as on-time for his/her cohort in the school to which he/she transfers);
	      b. An on-time student enrolled in a home school (SIS withdrawal code = 17)
	      c. An on-time student enrolled in a private school (SIS withdrawal code = 16)
	      d. An on-time student Enrolled in a school in another state or emigrates to another country (SIS withdrawal code = 18)
	 • Dies during that same period (SIS withdrawal code = 3).
	 • Beginning in 2018, on-time students who transfer to a juvenile facility (conditions apply); or home schooled students enrolled under Resident Codes 1, 2, or 4 will be removed from the cohort if student state ID and LEA are accurate for match to enrollment data downloaded from TRIAND.

Determining 4-year cohort graduation rate	$$\frac{\#\ actual\ graduates\ (as\ reported\ in\ Cycle\ 9\ Graduates\ table)}{\#\ initial\ cohort + \#\ ontime\ transfers\ in - \#\ of\ students\ who\ transfer\ out\ of\ cohort}$$ Actual Graduates = Number of cohort members who earned a regular high school diploma by the end of the school year four years after the year the cohort was established. For example, first time ninth graders in the 2012-2013 school year will be expected to graduate in the 2015-2016 school year. If a student who is a first time ninth grader in the

	2012-2013 school year graduates in the 2015-2016 school year, and is included in the Cycle 9 graduates table submitted by the school district, the student will be counted in the number of actual graduates.
	Initial Cohort = Number of first-time grade 9 students in fall of cohort starting year (starting cohort). If a school is configured as a Grades 10-12 or 11-12 high school, the Initial Cohort is the first time Grade 10 and first time Grade 11 students, respectively.
	Adjustments = The Initial cohort is adjusted by the number of students who transfer in during the four school years (three years for Grades 10-12 and two years for Grades 11-12 schools) of the cohort and the number of students who transfer out, emigrate to another country, transfer to a juvenile facility, or die during the four school years for the cohort.
	Certified data from Cycles 2 – 7 are used to adjust the cohort for transfers in and transfers out. Students' School LEAs in the adjusted cohort are the School LEAs where the students were last considered on-time based on grade level and expected progression from entry in the cohort. - First time Grade 9 students are expected to be in grades 10, 11, and 12 in the three successive years of their cohort. For Grades 10-12 schools, first time Grade 10 students are expected to progress to grades 11 and 12 in the successive two years. For Grades 11-12 schools, first time Grade 11 students are expected to progress to Grade 12 in their second year in the cohort. - Grade level of the student in each cycle is used to determine if a student transfers in 'on-time'. A student can fall behind and catch up within the same year or across multiple years. - If a student transfers into a school and appears to have repeated a grade, based on grade level in initial cohort and expected grade level at transfer in, then the student is no longer on-time and is not added to the school's cohort to which the student transfers. Instead, the student is retained in the school cohort in which the student was last on-time as indicated by whether the grade level of the student meets or exceeds the expected grade-level. - If a student repeats a grade or falls behind within the same school year and later catches up, and that student transfers into another school at the grade level expected based on the student's entry into the new school, then the student is removed from the former cohort and added to the transfer school's cohort as an on-time transfer. - Early graduates should be properly coded as early graduates and counted in the cohort that is the students' first on-time Grade 9 (schools with Grades 9-12), first on-time Grade 10 (schools with Grades 10-12), or first on-time Grade 11 (schools with Grades 11-12). Early graduates are not counted in the year they graduate as they are not part of that particular adjusted cohort. - Note: for Grades 10-12 schools, the cohort is determined by first time tenth graders. If a student repeated ninth grade and enrolls in a Grade 10-12 school as a first time tenth grader, the student becomes part of the Grades 10-12 school's cohort. The same is true for students in Grades 11-12 schools. The student is considered an on-time student in the school's cohort if they are first time eleventh grader, regardless of whether the student repeated Grade 9 and/or Grade 10. - Actual Graduates are those students listed as graduated in the certified Cycle 9 Graduates table for the year of expected graduation for cohort. The TRIAND transcript system *is not used* to pull graduation status of students in the initial calculation of the adjusted cohort graduation rate. Only certified Cycle 9 data are used.
Determining a three-year 4-year cohort graduation rate for schools who	If a school has fewer than 15 students in the expected graduates of the 4-year adjusted cohort then a three-year weighted average of the 4 Yr. Adjusted Cohort Graduation Rates is calculated using the following formula.

Graduation - 4 year Adjusted Cohort	
did not have at least 15 students expected to graduate in 2016.	$3Yr.Weighted\ Ave.\ ACGR\ for\ 2016$ $$= \frac{\#\ in\ 2014\ Cohort * (ACGR14) + \#\ in\ 2015\ Cohort * (ACGR15) + \#\ in\ 2016\ Cohort * (ACGR16)}{\#\ in\ 2014\ Cohort + \#\ in\ 2015\ Cohort + \#\ in\ 2016\ Cohort}$$ EXAMPLE $3Yr.Weighted\ Average\ ACGR\ for\ 2016$ $$= \frac{15\ in\ 2014\ Cohort * (89.00) + 11\ in\ 2015\ Cohort * (95.00) + 7\ in\ 2016\ Cohort * (100.00)}{15\ in\ 2014\ Cohort + 11\ in\ 2015\ Cohort + 7 in\ 2016\ Cohort}$$ $$3Yr.Weighted\ Average\ ACGR\ for\ 2016 = \frac{1335 + 1045 + 700}{33}$$ $$3Yr.Weighted\ Average\ ACGR\ for\ 2016 = \frac{3080}{33}$$ $$3Yr.Weighted\ Average\ ACGR\ for\ 2016 = 93.33$$

Graduation- 5 year Adjusted Cohort	
Description of Component or Indicator	Students will be identified for an adjusted cohort group by the year the student is first enrolled as a Grade 9 student. Students that graduate in five years, one year following the expected graduation date, will be counted in the five-year adjusted cohort graduation rate as a successful graduate. This new graduation rate that includes the 5-year graduates is considered the 5-year graduation rate.
Included Subgroups	1. All Students – All students in the school. 2. White – Student's race is identified as White and no other race or ethnicity is indicated. 3. African American – Student's race is identified as African American and no other race or ethnicity is indicated.

	4. Hispanic/Latino(a) – Student's ethnicity is identified as Hispanic/Latino(a). A student is designated as Hispanic/Latino(a) regardless of whether any other races are identified for the student. 5. Economically Disadvantaged – Student is indicated as participating in the Federal Free and Reduced Price Lunch Program. 6. English Learner – Student is indicated as an English Learner (EL) or student is indicated as a Former Monitored EL (for up to four years after exiting EL services). 7. Student with Disability(ies) – Student is indicated as receiving special education services.

Excluded Students	Students are removed from a school's cohort if the student meets the definition of a transfer as per USDE Guidance Question B-3 on page 16.
	https://www2.ed.gov/policy/elsec/leg/essa/essagradrateguidance.pdf
	A transfer out of a cohort occurs when a student leaves a high school and enrolls in another high school or in an educational program from which the student is expected to receive a regular high school diploma or State-defined alternate diploma that meets the requirements described in question A16**.**
	A State may not count as a transfer a student who is retained in grade, enrolls in a general equivalency diploma program, is transferred to a prison or juvenile facility that does not provide (or from which the student is not expected to receive) a regular high school diploma or a State defined alternate diploma that meets the requirements described in question A-16, or leaves high school for any other reason in the four-year or extended-year graduation rate; such students must remain in the adjusted cohort (i.e., must be included in the denominator of the graduation rate for that cohort). (ESEA section 8101(23)(C) and (25)(C); 34 C.F.R. § 200.34(b)(2)-(3)).
	    1. Transfers out;
	        a. An on-time student enrolled in another school in Arkansas (SIS withdrawal code = 1 and student enrolls as on-time for his/her cohort in the school to which he/she transfers);
	        b. An on-time student enrolled in a home school (SIS withdrawal code = 17)
	        c. An on-time student enrolled in a private school (SIS withdrawal code = 16)
	        d. An on-time student Enrolled in a school in another state or emigrates to another country (SIS withdrawal code = 18)
	    2. Dies during that same period (SIS withdrawal code = 3).
	    3. Beginning in 2018, on-time students who transfer to a juvenile facility (conditions apply); or home schooled students enrolled under Resident Codes 1, 2, or 4 will be removed from the cohort if student state ID and LEA are accurate for match to enrollment data downloaded from TRIAND.

Determining 5-year cohort graduation rate	$$\frac{\#\ actual\ graduates\ in\ 4\ years + \#\ actual\ graduates\ in\ 5th\ year}{\#\ initial\ cohort + \#\ on-time\ transfers\ in - \#\ of\ students\ who\ transfer\ out\ of\ cohort}$$ The five-year adjusted cohort graduation rate used in the ESSA School Index is a different cohort of students than the cohort of students in the four-year adjusted cohort graduation rate used in the same ESSA School Index calculation. For example, the 2017 ESSA School Index uses the 2016 four-year adjusted cohort graduation rate. Students in this four-year rate were first time Grade 9 students in the 2012-2013 school year. Students in the five-year rate were first time Grade 9 students in the 2011-2012 school year. They were expected to graduate in 2014-2015. However, they did not graduate on-time. These students would be counted as actual graduates in 5 years if they graduate in the 2015-2016 school year.

Graduation- 5 year Adjusted Cohort

Actual Graduates = Number of cohort members who earned a regular high school diploma by the end of the expected four years plus number of cohort members who earned a regular high school diploma in the fifth year (one year beyond the expected graduation year).

> For example, first time ninth graders in the 2011-2012 school year will be expected to graduate in the 2014-2015 school year. If a student who is a first time ninth grader in the 2011-2012 school year graduates in the 2014-2015 school year, and is included in the Cycle 9 graduates table submitted by the school district, the student will be counted in the number of actual graduates for the 2014-2015 adjusted cohort graduation rate. These students will also be counted in the 2015-2016 five-year adjusted cohort graduation rate. In addition, students who did not graduate in the expected four years and instead graduated in five years, will be included in the five-year adjusted cohort graduation rate for 2015-2016.

Initial Cohort = Number of first-time grade 9 students in fall of cohort starting year (starting cohort). If a school is a Grades 10-12 or 11-12 high school, the Initial Cohort is first time Grade 10 and first time Grade 11 students, respectively.

For the five-year adjusted cohort graduation rate, the same procedures are applied using certified data from Cycles 2-7 for the four years of the cohort as described in the adjustments below.

NOTE: for the five-year adjusted cohort rate, students who failed to graduate in their expected four years are treated as expected to be in grade 12 in their fifth year for the purposes of adjusting the five-year cohort.

Adjustments = Initial cohort is adjusted by the number of students who transfer in during the first four school years (first three years for Grades 10-12 and first two years for Grades 11-12 schools) of the cohort and the number of students who transfer out, emigrate to another country, transfer to a juvenile facility, or die during the four school years for the cohort. A second round of adjustments are carried out for the fifth year if students did not graduate by the fourth year.

Certified data from Cycles 2 – 7 are used to adjust the cohort for transfers in and transfers out. Students' School LEAs in the adjusted cohort is the School LEA where the students were last considered on-time based on grade level and expected progression from entry in the cohort.
- First time Grade 9 students are expected to be in grades 10, 11, and 12 in the three successive years of their cohort. For Grades 10-12 schools, first time Grade 10 students are expected to progress to grades 11 and 12 in the successive two years. For Grades 11-12 schools, first time Grade 11 students are expected to progress to grade 12 in their second year in the cohort. If the student fails to graduate in four years and is enrolled in, or transfers into, a school in the fifth year for their cohort the student is counted in the five-year adjusted cohort of students expected to graduate in five years.
- Grade level of the student in each cycle is used to determine if a student transfers in 'on-time'. A student can fall behind and catch up within the same year or across multiple years.
- If a student transfers into a school and appears to have repeated a grade, based on grade level in initial cohort and expected grade level at transfer in, then the student is no longer on-time and is not added to the school's cohort to which the student transfers. Instead, the student is retained in the school cohort in which the student was last on-time as indicated by whether the grade level of the student meets or exceeds the expected grade-level.
- If a student repeats a grade or falls behind within the same school year and later catches up, and that student transfers into another school at the grade level expected based on the student's entry into the new school, then the student is removed from the former cohort and added to the transfer school's cohort as an on-time transfer. For students who fail to graduate in four years, the student is treated as expected to be in Grade 12 in their fifth year. Therefore, if a student transfers into a school in their fifth year as a Grade 12 student the

	student is added to the school's five-year adjusted cohort. If the student graduates at the end of that year, the student is added as a five-year actual graduate.
	• Early graduates should be properly coded as early graduates and counted in the cohort that is the students' first on-time grade 9 (schools with Grades 9-12), first on-time grade 10 (schools with Grades 10-12), or first on-time grade 11 (schools with Grades 11-12). Early graduates are not counted in the year they graduate as they are not part of that particular adjusted cohort.
	• Note: for Grades 10-12 schools, the cohort is determined by first time tenth graders. If a student repeated ninth grade and enrolls in a Grade 10-12 school as a first time tenth grader, the student becomes part of the Grades 10-12 school's cohort. The same is true for students in Grades 11-12 schools. The student is considered an on-time student in the school's cohort if they are first time eleventh grader, regardless of whether the student repeated grade 9 and/or grade 10.
	• Actual Graduates are those students listed as graduated in the certified Cycle 9 Graduates table for the four-year adjusted cohort plus students who graduate one year after their expected graduation year for their cohort. The TRIAND transcript system *is not used* to pull graduation status of students in the initial calculation of the adjusted cohort graduation rate. Only certified Cycle 9 data are used.
Determining a three-year 5-year cohort graduation rate for schools who did not have at least 15 expected graduates by 2016	$3Yr.\,Weighted\,Ave.$ $ACGR\,for\,2016$ $= \dfrac{\#\,in\,2014\,Cohort*(ACGR14)+\#\,in\,2015\,Cohort*(ACGR15)+\#\,in\,2016\,Cohort*(ACGR16)}{\#\,in\,2014\,Cohort+\#\,in\,2015\,Cohort+\#\,in\,2016\,Cohort}$ EXAMPLE $3Yr.\,Weighted\,Average$ $of\,the\,five-year\,ACGR\,for\,2016$ $=\dfrac{12\,in\,2014\,5yr\,Cohort*(84.00)+11\,in\,2015\,5yr\,Cohort*(93.00)+12\,in\,2016\,5yr\,Cohort*(100.00)}{12\,in\,5yr\,2014\,Cohort+11\,in\,5yr\,2015\,Cohort+12\,in\,2016\,5yr\,Cohort}$ $3Yr.\,Weighted\,Average\,of\,the\,five-year\,ACGR\,for\,2016=\dfrac{1008+1023+1200}{35}$ $3Yr.\,Weighted\,Average\,of\,the\,five-year\,ACGR\,for\,2016=\dfrac{3231}{35}$ $3Yr.\,Weighted\,Average\,for\,the\,five-year\,ACGR\,for\,2016=\,92.31$

School Quality and Student Success Indicator

The School Quality and Student Success (SQSS) Indicator is composed of a number of different components. The components are calculated as the percentage of points earned out of points possible per student. Dividing by points possible provides comparability among schools statewide. Points per student are earned by schools for each component that applies to the grades served by the school. The points earned and points possible are summed across all indicators and the percentage of points earned is calculated for SQSS for the school.

Schools that have non-mobile students with reading scores in any of the grades 3-10 will have reading achievement component scores. Schools that have non-mobile students with science scores in any of the grades 3-10 will have science achievement component scores. Schools that have non-mobile students with science scores in any of the grades 4-10 will have science growth scores (a prior score received in the state of Arkansas must be included to calculate growth). Schools that have non-mobile students in any of the grades 9 – 11 (middle or high school grade span) will have the on-time credit component. Schools that have non-mobile students enrolled in grade 12 certified in Cycle 7 (data is collected on June 15) will have ACT Composite, ACT College Readiness Benchmark, state cumulative Grade Point Average (GPA), Advanced Placement (AP), International Baccalaureate (IB), Concurrent Credit (CC), Computer science, and Community Service Learning Components.

The following sections describe the calculation for each component of SQSS.

Student Engagement Component	
Description of Component or Indicator	Using student-level attendance and student absenteeism risk level as proxy for student engagement. For 2017-18, absences reported to the state are defined as: A student is absent if he or she is not on school grounds, **unless** the student participates in an instruction-related activity at a district approved (identified in the district attendance policy) off-grounds location for the school day.
Included Subgroups	1. All Students – All students in the school. (Cycle 7) 2. White – Student's race is identified as White and no other race or ethnicity is indicated. (Cycle 7) 3. African American – Student's race is identified as African American and no other race or ethnicity is indicated. (Cycle 7) 4. Hispanic/Latino(a) – Student's ethnicity is identified as Hispanic/Latino(a). A student is designated as Hispanic/Latino(a) regardless of whether any other races are identified for the student. (Cycle 7) 5. Economically Disadvantaged – Student is indicated as participating in the Federal Free and Reduced Price Lunch Program. (Cycle 7) 6. English Learner – Student is indicated as an English Learner (EL) or student is indicated as a Former Monitored EL (for up to four years after exiting EL services). (Cycle 7) 7. Student with Disability(ies) – Student is indicated as receiving special education services. (Cycle 6 for 2017-18 data)

Student Engagement Component	
Included Students	Grades K - 11 students enrolled at each school--certified in cycle 7 of the statewide information system data collection schedule (June 15) each school year. This is the denominator of the student engagement component and is comparable for schools across the state. The following conditions are applied to the students included in the calculation. • Mobile students are included. • Students who were enrolled for a minimum of 10 days. • If a student was enrolled in multiple schools during the school year, the student would be included in each school. • For juvenile justice school (DYS) and department of health services schools, students must have been enrolled for a minimum of 60 days.
Excluded Students	1. Beginning in 2018, exclude home schooled students (Resident Code = 1, 2, 4) if student state ID and LEA are accurate for match to enrollment data downloaded from TRIAND.

Student Level Chronic Absence Calculations	1. Calculate attendance rate for each student at each school, which is (total present days) / (total present days + total absent days).
	2. Determine risk level for chronic absence for each student at each school.
	    a. Students absent 0-less than 5% of days enrolled considered low risk and assigned 1 point.
	    b. Students absent 5% to less than 10% of days enrolled considered moderate risk and assigned 0.5 points.
	    c. Students absent 10% or more of days enrolled considered high risk for chronic absence and assigned 0 points.

Calculate percent of points earned per student for risk level related to Chronic Absence	1. Determine the school-level points earned per student for student engagement. a. School-level points earned for student engagement = Sum of points earned per student for absence risk level / number of students enrolled $$School\ Engagement\ Points = \frac{\sum Points\ Earned\ Per\ Student\ Enrolled}{Number\ of\ Students\ Enrolled}$$
Variables related to Chronic Absence	• Number of Students Enrolled in School (Cycle 7 Certified Submission) • Days Absent and Days Present for Enrolled Students (Cycles 3, 5, 6,7) • Student Absence Risk Level: Low, Moderate, High • Number of Points Possible for Student Engagement (Number of student enrolled) • Number of Points Earned Per Student for Engagement (sum of points for risk level of students)

Reading Achievement Component	
Description of Component or Indicator	Using student-attained achievement level on ACT Aspire Reading as a proxy for describing students as Reading at Grade Level.
Included Subgroups	1. All Students – All students in the school. 2. White – Student's race is identified as White and no other race or ethnicity is indicated. 3. African American – Student's race is identified as African American and no other race or ethnicity is indicated. 4. Hispanic/Latino(a) – Student's ethnicity is identified as Hispanic/Latino(a). A student is designated as Hispanic/Latino(a) regardless of whether any other races are identified for the student. 5. Economically Disadvantaged – Student is indicated as participating in the Federal Free and Reduced Price Lunch Program.

Reading Achievement Component	
	6. English Learner – Student is indicated as an English Learner (EL) or student is indicated as a Former Monitored EL (for up to four years after exiting EL services). 7. Student with Disability(ies) – Student is indicated as receiving special education services. Data pulled from TRIAND: ACT Aspire –April 6, 2018
Included Students	Grades 3 - 10 full academic year students enrolled at each school and completing state required assessment in reading (ACT Aspire). This is the denominator of the reading achievement component and is comparable for schools across the state.
Excluded Students	1. Highly mobile students are excluded from the school calculations. 2. Beginning in 2018, exclude home schooled students (Resident Code = 1, 2, 4) if student state ID and LEA are accurate for match to enrollment data downloaded from TRIAND.

Reading at Grade Level Determination	Students are considered to be reading at grade level if the student attains an achievement level of Ready or Exceeds on the ACT Aspire.
	      a. If student scores at Ready or Exceeds achievement level on ACT Aspire Reading then the student receives 1 point.
	      b. If the student scores at In Need of Support or Close achievement level on ACT Aspire Reading then student receives 0 points.

Determining Mean School Percent Reading at Grade Level	Determine the school-level points earned per student for reading at grade level. • School-level points earned for Reading at Grade Level = Sum of points earned per student at Ready/Exceeds / number of students tested Reading $$Reading\ at\ Grade\ Level\ Points = \frac{\sum Points\ Earned\ Per\ Student\ Tested\ Reading}{Number\ of\ Students\ Tested\ Reading}$$
Variables related to Reading at Grade Level	• Students Tested in Reading on required statewide ACT Aspire • Student full academic year status (mobility) • Number of Points Possible for Reading at Grade Level (number of students tested in reading) • Number of Points Earned Per Student for Reading at Grade Level (sum of points for students scoring at Ready or Exceeds achievement levels)

Science Achievement Component	
Description of Component or Indicator	Using student-attained achievement level in Science as a proxy for describing students as Science Ready.
Included Subgroups	1. All Students – All students in the school. 2. White – Student's race is identified as White and no other race or ethnicity is indicated. 3. African American – Student's race is identified as African American and no other race or ethnicity is indicated. 4. Hispanic/Latino(a) – Student's ethnicity is identified as Hispanic/Latino(a). A student is designated as Hispanic/Latino(a) regardless of whether any other races are identified for the student. 5. Economically Disadvantaged – Student is indicated as participating in the Federal Free and Reduced Price Lunch Program. 6. English Learner – Student is indicated as an English Learner (EL) or student is indicated as a Former Monitored EL (for up to four years after exiting EL services). 7. Student with Disability(ies) – Student is indicated as receiving special education services. Data pulled from TRIAND:

Science Achievement Component	
	Arkansas Alternate Portfolio Assessment for Science will be downloaded on March 15, 2018. ACT Aspire – April 6, 2018
Assessments & Grade Levels Included	• Grade 3 – 10 full academic year students enrolled at each school and completing state required assessment in science (ACT Aspire). • Arkansas Alternative Portfolio Assessment for Science (AAPA Science), Grades: 5, 7, 10, and flagged for alternate science portfolio
Included Subject	Science
Included Students	Grades 3 - 10 full academic year students enrolled at each school and completing state required assessment in Science (ACT Aspire or AAPA). This is the denominator of the Science achievement points and is comparable for schools across the state.
Excluded Students	1. Highly mobile students are excluded from the school calculation. 2. Beginning in 2018, exclude home schooled students (Resident Code = 1, 2, 4) if student state ID and LEA are accurate for match to enrollment data downloaded from TRIAND.

Science Readiness Determination	Students are considered to be at Readiness level if the student scores at an achievement level of Ready or Exceeds on ACT Aspire.
	    a. If student scores at Ready or Exceeds achievement level on ACT Aspire Science then the student receives 1 point. If the student scores at the Independent or Functional Independence Level on the AAPA the student receives 1 point.
	    b. If the student scores at In Need of Support or Close achievement level on ACT Aspire, or the student scores at the Supported Independence, Emerging Independence, or Not Emerging on the AAPA in Science, then student receives 0 points.

Determining Mean School Percent Science Ready	Determine the school-level points earned per student for Science Readiness • School-level points earned for Science Readiness = Sum of points earned per student for Science Readiness / number of students tested in science $$Science\ Readiness\ Points = \frac{\sum Points\ Earned\ Per\ Student\ Tested\ Science}{Number\ of\ Students\ Tested\ Science}$$
Variables related to Science Readiness	• Students Tested in Science on required statewide ACT Aspire • Student full academic year status (mobility) • Number of Points Possible for Science Readiness (number of students tested in Science) • Number of Points Earned Per Student for Science Readiness (sum of points for students scoring at Ready or Exceeds achievement levels)

Science Value-Added Growth Component	
Description of Component or Indicator	Science Value-Added Growth is calculated at the student level using the same growth model procedures described for ELA and math. Once students' science value-added scores are obtained, students' scores are ordered within grade level from lowest to highest science value-added score. Each score is assigned a rank of 1 to 99 within grade level. This is called the percentile rank of the residual. The residual is the value-added score for the student.
Included Subgroups	1. All Students – All students in the school. 2. White – Student's race is identified as White and no other race or ethnicity is indicated. 3. African American – Student's race is identified as African American and no other race or ethnicity is indicated. 4. Hispanic/Latino(a) – Student's ethnicity is identified as Hispanic/Latino(a). A student is designated as Hispanic/Latino(a) regardless of whether any other races are identified for the student. 5. Economically Disadvantaged – Student is indicated as participating in the Federal Free and Reduced Price Lunch Program. 6. English Learner – Student is indicated as an English Learner (EL) or student is indicated as a Former Monitored EL (for up to four years after exiting EL services).

Science Value-Added Growth Component	
	7. Student with Disability(ies) – Student is indicated as receiving special education services. Data pulled from TRIAND: ACT Aspire –April 6, 2018
Included Students	Grades 4 - 10 full academic year students enrolled at each school and completing state required assessment in Science (ACT Aspire). This is the denominator of the Science Value-added growth points and is comparable for schools across the state. Must include a prior score within the state of Arkansas for a student to be included.
Excluded Students	1. Highly mobile students are excluded from the school calculation. 2. Beginning in 2018, exclude home schooled students (Resident Code = 1, 2, 4) if student state ID and LEA are accurate for match to enrollment data downloaded from TRIAND.

Science Growth - Student Level	1. Value-added Growth scores for science achievement are classified into three levels for assigning points.
	 2. The percentile rank of the science value-added growth score is obtained for each student within each grade level.
	     a. If a student's value-added growth score is at or above the 75th percentile for his/her grade level then the student receives 1 point.
	     b. If a student's valued-added growth score is at or above the 25th percentile rank and below the 75th for his/her grade level then the student receives 0.5 points.
	     c. If the student's value-added growth score is below the 25th percentile rank for his/her grade level then the student receives 0 points.

Science Value-Added Growth - School Level	Determine the school-level points earned per student for Science Value-Added Growth. • School-level points earned for Science Value-Added Growth = Sum of points earned per student for Science Growth / number of students w growth scores $$Science\ Value-Added\ Grow\ Points = \frac{\sum Points\ Earned\ Per\ Student\ w\ Science\ Growth}{Number\ of\ Students\ with\ Science\ Growth}$$
Variables related to Science Growth	• Students Tested in Science on required statewide ACT Aspire • Student full academic year status (mobility) • Number of Points Possible for Science Growth (number of students with science growth scores) • Number of Points Earned Per Student for Science Growth (sum of points for students' value-added science growth scores)

On-time Credits Component	
Description of Component or Indicator	Using On-Time Credits for grades 9 – 11 for secondary success component
Included Subgroups	1. All Students – All students in the school. (Cycle 7) 2. White – Student's race is identified as White and no other race or ethnicity is indicated. (Cycle 7) 3. African American – Student's race is identified as African American and no other race or ethnicity is indicated. (Cycle 7) 4. Hispanic/Latino(a) – Student's ethnicity is identified as Hispanic/Latino(a). A student is designated as Hispanic/Latino(a) regardless of whether any other races are identified for the student. (Cycle 7) 5. Economically Disadvantaged – Student is indicated as participating in the Federal Free and Reduced Price Lunch Program. (Cycle 7) 6. English Learner – Student is indicated as an English Learner (EL) or student is indicated as a Former Monitored EL (for up to four years after exiting EL services). (Cycle 7) 7. Student with Disability(ies) – Student is indicated as receiving special education services. (Cycle 6 for 2017-18 data)

On-time Credits Component	
Included Students	Grades 9 - 11 active students enrolled at each school--certified in cycle 7 (remove students with drop/withdrawal date) of the statewide information system data collection schedule (June 15) each school year. This is the denominator of the on-time credits component and is comparable for schools across the state.
Excluded Students	1. Highly mobile students are excluded from the school calculation. 2. Beginning in 2018, exclude home schooled students (Resident Code = 1, 2, 4) if student state ID and LEA are accurate for match to enrollment data downloaded from TRIAND.

On-Time Credits Calculations-Student Level	1. Calculate number of credits earned by each student at each of grades 9, 10, and 11 for any school with any of these grade levels.
	2. Determine points based on on-time credits for grade level.
	    a. If grade 9 student completes 5.5 or more credits by end of grade 9 student receives 1 point. Otherwise, the student receives 0 points.
	    b. If grade 10 student completes 11 or more credits by end of grade 10 student receives 1 point. Otherwise, the student receives 0 points.
	    c. If grade 11 student completes 16.5 or more credits by end of grade 11 student receives 1 point. Otherwise, the student receives 0 points.

On-Time Credits - School Level	Determine the school-level points earned per student for on-time credits. For schools with any of grades 9, 10, and/or 11: a. School-level points earned for on-time credits= Sum of points earned per student for on-time credits/ number of students enrolled in qualifying grade levels $$On-Time\ Credits\ Points = \frac{\sum Points\ Earned\ for\ On-Time\ Credits\ Per\ Student\ Enrolled}{Number\ of\ Students\ Enrolled}$$
Variables related to On-Time Credits	• Number of active students enrolled in School (Cycle 7 Certified Submission) • Student Course Completion (Cycle 7 Certified Submission) • Grade Level • Student Full Academic Year status • Number of Points Possible for On-Time Credits (Number of student enrolled in grades 9, 10, and/or 11 at school) • Number of Points Earned Per Student On-Time Credits (sum of points for students enrolled in grades 9, 10, and/or 11 at school)

High School GPA Component	
Description of Component or Indicator	Using cumulative state GPA as high school success and postsecondary readiness indicator.
Included Subgroups	1. All Students – All students in the school. (Cycle 7) 2. White – Student's race is identified as White and no other race or ethnicity is indicated. (Cycle 7) 3. African American – Student's race is identified as African American and no other race or ethnicity is indicated. (Cycle 7) 4. Hispanic/Latino(a) – Student's ethnicity is identified as Hispanic/Latino(a). A student is designated as Hispanic/Latino(a) regardless of whether any other races are identified for the student. (Cycle 7) 5. Economically Disadvantaged – Student is indicated as participating in the Federal Free and Reduced Price Lunch Program. (Cycle 7) 6. English Learner – Student is indicated as an English Learner (EL) or student is indicated as a Former Monitored EL (for up to four years after exiting EL services). (Cycle 7)

High School GPA Component	
	7. Student with Disability(ies) – Student is indicated as receiving special education services. (Cycle 6 for 17-18 data)
Included Students	Grade 12 students enrolled at each school--certified in cycle 7 of the statewide information system data collection schedule (June 15) each school year. This is the denominator of the High School GPA component and is comparable for schools across the state.
Excluded Students	1. Highly mobile Grade 12 students are excluded from the school calculation. 2. Beginning in 2018, exclude home schooled students (Resident Code = 1, 2, 4) if student state ID and LEA are accurate for match to enrollment data downloaded from TRIAND.

High School GPA Calculations- Student Level	1. Final High School GPAs are submitted to the statewide information system in Cycle 7 certified submission. These final high school GPAs are used for this component.
	 2. Determine points for high school GPA.
	     a. Students with a high school GPA greater than or equal to 2.8 receive 1 point.
	     b. Students with a high school GPA less than 2.8 receive 0 points.

High School GPA —School Level	Determine the school-level points earned per student for high school GPA. • School-level points earned for high school GPA = Sum of points earned per student / number of Grade 12 students enrolled: $$High\ School\ GPA\ Points = \frac{\sum Points\ Earned\ Per\ Grade\ 12\ Student\ Enrolled}{Number\ of\ Grade\ 12\ Students\ Enrolled}$$
Variables related to High School GPA	• Number of active Grade 12 Students Enrolled in School (Cycle 7 Certified Submission) • Final High School GPA submitted for Grade 12 students in Cycle 7 Certified Submission • Full Academic Year Status • Number of Points Possible for High School GPA (Number of Grade 12 students enrolled) • Number of Points Earned for High School GPA (sum of points Grade 12 students)

ACT Scores Component	
Description of Component or Indicator	Using ACT Composite and Subject Scores for postsecondary readiness indicator.
Included Subgroups	1. All Students – All students in the school. (Cycle 7) 2. White – Student's race is identified as White and no other race or ethnicity is indicated. (Cycle 7) 3. African American – Student's race is identified as African American and no other race or ethnicity is indicated. (Cycle 7) 4. Hispanic/Latino(a) – Student's ethnicity is identified as Hispanic/Latino(a). A student is designated as Hispanic/Latino(a) regardless of whether any other races are identified for the student. (Cycle 7) 5. Economically Disadvantaged – Student is indicated as participating in the Federal Free and Reduced Price Lunch Program. (Cycle 7) 6. English Learner – Student is indicated as an English Learner (EL) or student is indicated as a Former Monitored EL (for up to four years after exiting EL services). (Cycle 7) 7. Student with Disability(ies) – Student is indicated as receiving special education services. (Cycle 6)
Included Students	Grade 12 students who are enrolled at each school—certified in cycle 7 of the statewide information system data collection schedule (June 15) each school year. This is the denominator of the ACT component and is comparable for schools across the state.
Excluded Students	1. Highly mobile Grade 12 students are excluded from the school calculation. 2. Beginning in 2018, exclude home schooled students (Resident Code = 1, 2, 4) if student state ID and LEA are accurate for match to enrollment data downloaded from TRIAND.

ACT Scores Component	

ACT Composite-Student Level	1. Grade 12 students enrolled at each school are submitted to the statewide information system in Cycle 7 certified submission. The active students in Grade 12 are used for this component.
	2. Determine students' highest ACT Composite score. Look back at all ACT scores received in prior 3 years to obtain highest ACT Composite score. Cumulative data files received from vendor in August. Last test score included is June assessment.
	3. Determine points for ACT Composite.
	    a. Students with an ACT Composite greater than or equal to 19 receive 1 point.
	    b. Students with an ACT Composite less than 19 receive 0 points.

ACT Composite - School Level	Determine the school-level points earned per Grade 12 students for ACT Composite. • School-level points earned for ACT Composite = Sum of points earned per student / number of Grade 12 students enrolled: $$ACT\ Composite\ Points = \frac{\sum Points\ Earned\ Per\ Grade\ 12\ Student\ Enrolled}{Number\ of\ Grade\ 12\ Students\ Enrolled}$$
Variables related to ACT Composite	• Number of active Grade 12 Students Enrolled in School (Cycle 7 Certified Submission) • ACT Scores for 3 years from national and state administrations • Full Academic Year Status • Number of Points Possible for ACT Composite(Number of Grade 12 students enrolled) • Number of Points Earned for ACT Composite (sum of points Grade 12 students with ACTs)

ACT Readiness Benchmark Component	
Description of Component or Indicator	Using ACT Readiness Benchmark Scores for postsecondary readiness indicator.
Included Subgroups	1. All Students – All students in the school. (Cycle 7) 2. White – Student's race is identified as White and no other race or ethnicity is indicated. (Cycle 7) 3. African American – Student's race is identified as African American and no other race or ethnicity is indicated. (Cycle 7) 4. Hispanic/Latino(a) – Student's ethnicity is identified as Hispanic/Latino(a). A student is designated as Hispanic/Latino(a) regardless of whether any other races are identified for the student. (Cycle 7) 5. Economically Disadvantaged – Student is indicated as participating in the Federal Free and Reduced Price Lunch Program. (Cycle 7) 6. English Learner – Student is indicated as an English Learner (EL) or student is indicated as a Former Monitored EL (for up to four years after exiting EL services). (Cycle 7) 7. Student with Disability(ies) – Student is indicated as receiving special education services. (Cycle 6 for 2017-18 data)
Included Students	Grade 12 students who are enrolled at each school—certified in cycle 7 of the statewide information system data collection schedule (June 15) each school year. This is the denominator of the ACT component and is comparable for schools across the state.
Excluded Students	1. Highly mobile Grade 12 students are excluded from the school calculation. 2. Beginning in 2018, exclude home schooled students (Resident Code = 1, 2, 4) if student state ID and LEA are accurate for match to enrollment data downloaded from TRIAND.
ACT Readiness Benchmarks-Student Level	1. Grade 12 students enrolled at each school are submitted to the statewide information system in Cycle 7 certified submission. The active students in Grade 12 are used for this component. 2. Determine students' highest ACT Reading, Math, and Science score. Look back at all ACT scores received in prior 3 years to obtain highest ACT scores earned for any Grade

ACT Readiness Benchmark Component	

	12 students. Cumulative data files received from vendor in August. Cumulative data files received from vendor in August. Last test score included is June assessment.
	3. Determine points for ACT Readiness Benchmark.
	    a. Students with an ACT Math score greater than or equal to 22 receives 0.5 points.
	    b. Students with an ACT Reading score greater than or equal to 22 receives 0.5 points.
	    c. Students with an ACT Science score greater than or equal to 23 receives 0.5 points.

ACT Readiness Benchmarks - School Level	Determine the school-level points earned per Grade 12 students for ACT Composite. • School-level points earned for ACT Composite = Sum of points earned per student: $$\text{ACT Readiness} \atop \text{Benchmark Points} = \frac{\sum Points\ Earned\ Per\ Grade\ 12\ Student\ Enrolled}{Number\ of\ Grade\ 12\ Students\ Enrolled}$$
Variables related to ACT Readiness Benchmarks	• Number of active Grade 12 Students Enrolled in School (Cycle 7 Certified Submission) • ACT Scores for 3 years from national and state administrations • Full Academic Year Status • Number of Points Possible for ACT Readiness Benchmarks (Number of Grade 12 students enrolled) • Number of Points Earned for ACT Readiness Benchmarks (sum of points Grade 12 students with ACTs)

AP/IB/Concurrent Credit Component	
Description of Component or Indicator	Using credit-earning in Advanced Placement, International Baccalaureate, and Concurrent Credit courses as access and postsecondary readiness indicator.
Included Subgroups	1. All Students – All students in the school. (Cycle 7) 2. White – Student's race is identified as White and no other race or ethnicity is indicated. (Cycle 7) 3. African American – Student's race is identified as African American and no other race or ethnicity is indicated. (Cycle 7) 4. Hispanic/Latino(a) – Student's ethnicity is identified as Hispanic/Latino(a). A student is designated as Hispanic/Latino(a) regardless of whether any other races are identified for the student. (Cycle 7) 5. Economically Disadvantaged – Student is indicated as participating in the Federal Free and Reduced Price Lunch Program. (Cycle 7) 6. English Learner – Student is indicated as an English Learner (EL) or student is indicated as a Former Monitored EL (for up to four years after exiting EL services). (Cycle 7) 7. Student with Disability(ies) – Student is indicated as receiving special education services. (Cycle 6)
Included Students	Active Grade 12 students who are enrolled at each school—certified in cycle 7 of the statewide information system data collection schedule (June 15) each school year. This is the denominator of the AP/IB/Concurrent Credit component and is comparable for schools across the state. Concurrent Credit includes Arkansas Career Education (ACE) concurrent credit courses.
Excluded Students	1. Highly mobile Grade 12 students are excluded from the school calculation. 2. Beginning in 2018, exclude home schooled students (Resident Code = 1, 2, 4) if student state ID and LEA are accurate for match to enrollment data downloaded from TRIAND.

AP/IB/Concurrent Credit Component	

AP/IB/Concurrent Credit -Student Level	1. Grade 12 students enrolled at each school are submitted to the statewide information system in Cycle 7 certified submission. The active students in Grade 12 are used for this component.
	2. Course completion and credit data from cycle 7 certified submission for each of four years of high school for the current grade 12 class.
	3. Determine points for AP/IB/Concurrent Credit.
	    a. Students with one or more AP/IB/Concurrent Credit course credits earn 1.0 point. Otherwise students earn 0 points.
	    b. Course Codes for this component are listed in Appendix B.

AP/IB/Concurrent Credit -School Level	Determine the school-level points earned per Grade 12 students for AP/IB/Concurrent Credit. • School-level points earned for AP/IB/Concurrent Credit = Sum of points earned per student $$\text{AP/IB/Concurrent Credit } Points = \frac{\sum Points\ Earned\ Per\ Grade\ 12\ Student\ Enrolled}{Number\ of\ Grade\ 12\ Students\ Enrolled}$$
Variables related to AP/IB/Concurrent Credit	• Number of active Grade 12 Students Enrolled in School (Cycle 7 Certified Submission) • Course Credits Earned for each high school year for Grade 12 class • Number of Points Possible for AP/IB/Concurrent Credit (Number of Grade 12 students enrolled) • Number of Points Earned for AP/IB/Concurrent Credit (sum of points Grade 12 students)

Computer Science Component	
Description of Component or Indicator	Using credit-earning in computer science as access and postsecondary readiness indicator. The course codes used are listed in Appendix B-Computer Science Course Codes.
Included Subgroups	1. All Students – All students in the school. (Cycle 7) 2. White – Student's race is identified as White and no other race or ethnicity is indicated. (Cycle 7) 3. African American – Student's race is identified as African American and no other race or ethnicity is indicated. (Cycle 7) 4. Hispanic/Latino(a) – Student's ethnicity is identified as Hispanic/Latino(a). A student is designated as Hispanic/Latino(a) regardless of whether any other races are identified for the student. (Cycle 7) 5. Economically Disadvantaged – Student is indicated as participating in the Federal Free and Reduced Price Lunch Program. (Cycle 7) 6. English Learner – Student is indicated as an English Learner (EL) or student is indicated as a Former Monitored EL (for up to four years after exiting EL services). (Cycle 7) 7. Student with Disability(ies) – Student is indicated as receiving special education services. (Cycle 6)
Included Students	Grade 12 students who are enrolled at each school—certified in cycle 7 of the statewide information system data collection schedule (June 15) each school year. This is the denominator of the computer science component and is comparable for schools across the state.
Excluded Students	1. Highly mobile Grade 12 students are excluded from the school calculation. 2. Beginning in 2018, exclude home schooled students (Resident Code = 1, 2, 4) if student state ID and LEA are accurate for match to enrollment data downloaded from TRIAND.
Computer Science- Student Level	1. Grade 12 students enrolled at each school are submitted to the statewide information system in Cycle 7 certified submission. The active students in Grade 12 are used for this component.

Computer Science Component	
	2. Course completion and credit data from cycle 7 certified submission for each of four years of high school for the current grade 12 class. For 2016-17 and 2017-18, students can get credit from courses taken in grades 9-12. For 2018-2019, grade 12 students can get credit for a computer science course they took in 5th -12th grade if they received a high school credit for the course. 3. Determine points for computer science. c. Students with one or more computer science course credits earn 1.0 point. Otherwise students earn 0 points.
Computer Science -School Level	Determine the school-level points earned per Grade 12 students for computer science. • School-level points earned for computer science = Sum of points earned per student $$Computer\ Science\ Points = \frac{\sum Points\ Earned\ Per\ Grade\ 12\ Student\ Enrolled}{Number\ of\ Grade\ 12\ Students\ Enrolled}$$
Variables related to Computer Science	• Number of Grade 12 Students Enrolled in School (Cycle 7 Certified Submission) • Course Credits Earned for each high school year for Grade 12 class • Number of Points Possible for Computer Science (Number of Grade 12 students enrolled) • Number of Points Earned for Computer Science (sum of points Grade 12 students)

Community Service/Service Learning Component	
Description of Component or Indicator	Using credit-earning in community service/service learning as access and postsecondary readiness indicator.
Included Subgroups	1. All Students – All students in the school. (Cycle 7) 2. White – Student's race is identified as White and no other race or ethnicity is indicated. (Cycle 7) 3. African American – Student's race is identified as African American and no other race or ethnicity is indicated. (Cycle 7) 4. Hispanic/Latino(a) – Student's ethnicity is identified as Hispanic/Latino(a). A student is designated as Hispanic/Latino(a) regardless of whether any other races are identified for the student. (Cycle 7) 5. Economically Disadvantaged – Student is indicated as participating in the Federal Free and Reduced Price Lunch Program. (Cycle 7) 6. English Learner – Student is indicated as an English Learner (EL) or student is indicated as a Former Monitored EL (for up to four years after exiting EL services). (Cycle 7) 7. Student with Disability(ies) – Student is indicated as receiving special education services. (Cycle 6)
Included Students	Grade 12 students who are enrolled at each school—certified in cycle 7 of the statewide information system data collection schedule (June 15) each school year. This is the denominator of the Community Service component and is comparable for schools across the state.
Excluded Students	1. Highly mobile students are excluded from the school calculation. 2. Beginning in 2018, exclude home schooled students (Resident Code = 1, 2, 4) if student state ID and LEA are accurate for match to enrollment data downloaded from TRIAND.
Community Service -Student Level	1. Grade 12 students enrolled at each school are submitted to the statewide information system in Cycle 7 certified submission. The active students in Grade 12 are used for this component. 2. Course completion and credit data from cycle 7 certified submission for each of four years of high school for the current grade 12 class. For 2017-18, Community or Service Learning Course Codes 999120 and 496010 are used. http://adecm.arkansas.gov/ViewApprovedMemo.aspx?Id=3575 3. Determine points for Community Service.

Community Service/Service Learning Component	
	a. Students with one or more Community Service course credits earn 1.0 point. Otherwise students earn 0 points.
Community Service -School Level	Determine the school-level points earned per Grade 12 student for Community Service. • School-level points earned for Community Service = Sum of points earned per student $$\text{Community Service } Points = \frac{\sum Points\ Earned\ Per\ Grade\ 12\ Student\ Enrolled}{Number\ of\ Grade\ 12\ Students\ Enrolled}$$
Variables related to Community Service	• Number of active Grade 12 Students Enrolled in School (Cycle 7 Certified Submission) • Course Credits Earned for each high school year for Grade 12 class • Number of Points Possible for Community Service (Number of Grade 12 students enrolled) • Number of Points Earned for Community Service (sum of points Grade 12 students)

Compiling Total SQSS Score	
	The SQSS Score is compiled by summing points earned across all components in the numerator and points possible in the denominator.
Groups Calculated	1. All Students – All students in the school. 2. White – Student's race is identified as White and no other race or ethnicity is indicated. 3. African American – Student's race is identified as African American and no other race or ethnicity is indicated. 4. Hispanic/Latino(a) – Student's ethnicity is identified as Hispanic/Latino(a). A student is designated as Hispanic/Latino(a) regardless of whether any other races are identified for the student. 5. Economically Disadvantaged – Student is indicated as participating in the Federal Free and Reduced Price Lunch Program. 6. English Learner – Student is indicated as an English Learner (EL) or student is indicated as a Former Monitored EL (for up to four years after exiting EL services). 7. Student with Disability(ies) – Student is indicated as receiving special education services.
Calculation	1. Calculate possible points and earned points for each component of each student. Students may have different components due to different grade levels so the points possible provides a way to make the denominator comparable statewide within grade spans. 2. Calculate SQSS points for each student: the total possible points of SQSS is the summation of the possible points of all components, and the total earned points of SQSS is the summation of the earned points of all components. 3. Calculate SQSS points at the school level: the total possible points of the school is the summation of the possible points of its students, and the total earned points of the school is the summation of the earned points of its students. 4. Calculate percentage SQSS score at the school level: the percentage score equals to (total earned points / total possible points)*100.

Compiling Final ESSA Index Score	
	The final ESSA Index Score is calculated using all indicators. Weights differ by grade span assigned to the school and weights may differ for special grade ranges within a grade span. For more information on special grade ranges within grade spans go to the Special Schools Section that follows.
Groups Calculated	1. All Students – All students in the school. 2. White – Student's race is identified as White and no other race or ethnicity is indicated.

	3. African American – Student's race is identified as African American and no other race or ethnicity is indicated.
	4. Hispanic/Latino(a) – Student's ethnicity is identified as Hispanic/Latino(a). A student is designated as Hispanic/Latino(a) regardless of whether any other races are identified for the student.
	5. Economically Disadvantaged – Student is indicated as participating in the Federal Free and Reduced Price Lunch Program.
	6. English Learner – Student is indicated as an English Learner (EL) or student is indicated as a Former Monitored EL (for up to four years after exiting EL services).
	7. Student with Disability(ies) – Student is indicated as receiving special education services.
Calculation by Grade Span and Special Conditions	
Grade Spans 1 & 2 (And Grade Span 3 with no graduation data)	ESSA School Index Score $=$ (0.35*(weighted achievement score) + 0.50*(Growth with ELP) + 0.15*(SQSS)
Grade Span 3 (Only four year graduation rate)	ESSA School Index Score = 0.35*(weighted achievement score) + 0.35*(Growth with ELP) + 0.15*(Four-year Graduation Rate 2017) + 0.15*(SQSS)
Grade Span 3 (Four and five year graduation rates)	ESSA School Index Score = 0.35*(weighted achievement score) + 0.35*(Growth with ELP)+ 0.10*(Four-year Graduation Rate 2017) + .05*(Five-Year Graduation Rate 2017) + 0.15*(SQSS)

Special Schools: Feeder Schools and Special Grade Configurations

Feeder Schools

Schools with grade configurations that do not include a tested grade must be included in the accountability system. Most commonly these schools are primary schools that feed into an elementary or intermediate school. To include these schools in the accountability system these feeder schools are paired with an elementary school or schools that receive the students from the feeder school.

In the case of feeder schools, the achievement and growth of the paired school are used to provide an achievement and growth score for the feeder school. The achievement and growth score from the paired school are combined with the School Quality and Student Success Score for the feeder school. Since the feeder school does not have a tested grade, the School Quality and Student Success Score includes only one component—the Student Engagement component.

Special Grade Configurations

Schools in the high school grade span include schools with several different combinations of grade levels with as many or more assessed grades at Grades 9 and/or 10, or with a terminal grade level of Grade 12. Within this grade span are two special configurations:

- Junior high schools with Grades 8 and 9 only, or Grade 9 only; and,
- Schools with Grades 11 and 12 only.

These schools require special calculations to ensure they are included in the accountability system in the grade span that is best suited for comparison purposes.

For junior high schools with Grades 8 and 9 only, or Grade 9 only, the school does not have a four-year or five-year adjusted cohort graduation rate. Therefore, these schools ESSA School Index scores are calculated using the weights for Grade span 6 – 8 and the school is grouped with the high school grade span to ensure the school's achievement and

growth are in the grade span with other schools whose students take the ACT Aspire Early High School assessment (Grades 9 and 10).

Schools with configurations of Grades 11 and 12 only are paired with another high school within the district to include the weighted achievement and growth scores from the high school with tested grades (paired school). The weighted achievement and growth scores from the paired school are combined with the graduation rates and School Quality and Student Success Indicator scores to obtain a complete ESSA School Index score for the Grades 11-12 high school.

ACT Aspire ELA Cut Scores for Arkansas

1.   How were the high and low-cut scores for ELA determined?
The ACT Aspire national tests only report one single benchmark for ELA in each grade level. From spring 2014 to spring 2017, the reported ELA benchmark was calculated as the average of English, reading and writing benchmarks. In fall 2016, ADE requested low and high cut scores for ELA for the purposes of federal reporting and accountability.   ACT research recommended, and ADE approved, using the SEM (Standard Error Measurement) method to set these two additional cut scores for AR customized use: the 2 SEMs below or above the existing Aspire ELA benchmarks were defined as the low and high cut scores.

2.   Why are averages used to calculate the ELA Score and ELA Readiness cut score, but averages were not used to determine the high and low cut scores?
ACT recommended this SEM method because it is consistent with what was used to establish the high/low cut scores for individual subject tests. ACT criterion in developing the high/low cut scores for ACT Aspire is to make sure they are substantially away from the benchmark. With the methodology of 2 SEMs higher or lower, ACT is 95% confident that students scored above or below the benchmark.

3.   Why is it possible that a student can perform in the "Close" range on the benchmarks in each separate subject tests, and due to the calculations from the ELA Close Cut Score cause them to be "In Need of Support" for overall ELA?
The method to establish cut scores determines how the cut scores/benchmarks and resulting performance level are interpreted. The high and low cut scores were not created based on the "average" method. In other words, the high/low cut scores are not "compensatory". ACT recommends the "In Need of Support" and "Exceeding" categories in ELA indicates students' ELA scores are significantly below or above the ELA readiness benchmark, as in the individual subject tests. ELA is a more reliable measure since ELA scores are based on scores from three subject areas. High/low cut scores established based on SEM bears this in the interpretation. Therefore, it could happen that students who are classified in the same performance level based on the subject scores are in a different level based on the ELA scores.

More information
The ELA score for ACT Aspire is computed as the average of English, reading and writing scale scores. Because there was no ELA benchmark on the ACT to be aligned with at the time the ACT Aspire ELA benchmarks were established, the values were initially computed as the average of benchmarks from the three components that contributed to score. These ELA benchmarks were used in Aspire reports until spring 2017.

In fall 2017, the Aspire ELA and STEM benchmarks were updated to align with the corresponding ACT benchmarks. Please refer to the following two documents for this update.
- Description: Section 2 "Updating ELA and STEM Benchmarks" in Chapter "2018 Updates" in the ACT Aspire technical manual with the link http://actaspire.avocet.pearson.com/actaspire/home#pdf=8214_17967#page=1

   Methodology: https://www.act.org/content/dam/act/unsecured/documents/pdfs/R1665-aspire-ela-stem-benchmarks-2017-11.pdf

The Arkansas ELA cut scores for the four achievement levels are provided in the table below.   These cut scores will be reflected in 2018 ESSA reporting.

2018 Arkansas ELA Cut Scores								
Grade	**3**	**4**	**5**	**6**	**7**	**8**	**9**	**10**
ELA Close Cut Score	416	419	420	422	422	423	424	426
ELA Ready Cut Score	419	422	424	426	426	427	428	430
ELA Exceeds Cut Score	422	425	428	430	430	431	432	434

Courses are extracted based on the first 5 digits of the course code. This is due to the use of the 6th digit for local purposes. The list below shows a 0 in the 6th digit rather than all the different possibilities based on districts' local coding.

Please Note: As long as the first five digits of the course code match the codes listed below a student's course record will be in the extract.

Computer Science Course Codes

2018 Courses Used

Note the course codes for the 2017-18 school year will be different from the course codes used in the 2015-16 and 2016-17 calculations. The course code list for 2017-18 computer science will reflect the updated codes for the 2017-18 school year as indicated in the Course Code Management System.

2017-2018 School Year Computer Science Courses and Course Codes

	HS CS Level 1 *Note 1*	HS CS Level 2 *Note 1*	HS CS Level 3	HS CS Level 4	Advanced HS CS Level 1	Advanced HS CS Level 2	Additional Advanced HS CS Level 1	Additional Advanced HS CS Level 2
Computer Science with Programming/ Coding Emphasis	465010	465020	465030	465040	N/A	N/A	N/A	N/A
Mobile Application Development	465310	465320	465330	465340	N/A	N/A	Note 2	Note 2
Advanced Programming	N/A	N/A	N/A	N/A	465050	465060	N/A	N/A
Advanced Programming: Game Design	N/A	N/A	N/A	N/A	465650	465660	N/A	N/A

Appendix C

Assessment Correction Engine

The Assessment Correction Engine (ACE) interface will be available to all districts from July 31 through August 13, 2018 at the following link: https://adedata2.arkansas.gov/ace. Districts will be directed to the ADE Data Center to log in. District or School Level users should use their TRIAND login credentials to log in.

Districts are strongly encouraged to review the percent tested information and enter any needed reason not tested codes and documentation as early as possible. Recently Arrived English Learner status (first year in the United States) may be reviewed and edited. If editing status to indicate a student is a Recently Arrived English Learner, be prepared to enter the student's entry date in eSchool. Only data for the 2017-2018 school year can be changed.

All data corrections must be supported by *evidence in the form of documentation* that is uploaded through the ESEA ACE interface. The reason not tested list and required documentation for ESEA ACE are attached to Commissioner's Memo COM-18-100.

After reason not tested codes and documentation have been entered, the ACE Home screen can be used to submit corrections. Then the Certification Form signed by the District Superintendent must be uploaded. Corrections can be submitted for the district after logging in to the ACE with a Superintendent TRIAND username and password.

Questions concerning ESEA data corrections may be emailed to ade.schmail@arkansas.gov. Calls may be made to the Public School Accountability Office of School Performance at (501) 682-7339.
